TENT INSTALLATION WITH WATER BARRELS

In order for a tent to be properly assembled, the tent should be anchored to the ground with stakes. House of Rental does not recommend using any other means to anchor the tent. Should customer desire the tent to be anchored without stakes, House of Rental can secure the tent with 55 gallon water barrels. This process takes more time and adds risks of damage to the tent and any property under or near the tent.

If customer disregards House of Rental's recommendation that the tent be anchored with stakes, and chooses to secure the tent with water barrels instead, Customer does so at Customer's own risk, assumes all risk of damage and injury. Customer releases House of Rental from ALL liability and shall indemnify, defend and hold harmless House of Rental and assigns from and against, any and all liabilities, tent repairs or replacement, damages and injuries, claims, penalties, suits, actions, costs and expenses relating to or arising out of the use, condition, operation or return of the tent. At all times, Customer agrees to be responsible for the safety and security of the tent during the rental period and any layover period.
