TO WHOM IT MAY CONCERN

FLAME RETARDANCY

This is to certify that the fabric used to manufacture Tentnology® Marquee, Saddle Span, Mega tents, as well as TSpan & Max Headroom fabric structures satisfies the following specifications for flame retardancy:

ULC S109 03

NFPA 701 Large Scale Test

State of California Fire Marshall

Underwriters Laboratory - Method 214

National Coal Board Specification 245/1961 for flame retardancy

France - M2

Tentnology® tents with Tentnology original manufactured parts display the flame certificate on the label for the first two of these - Underwriter's Laboratory and National Fire Prevention Association.

Tentnology tents also satisfy European M2 requirements. The flame retardancy of the fabric is due to its composition and remains for the life of the fabric.

Yours faithfully,
TENTNOLOGY CO.
